

**AMENDMENTS TO THE SPECIFICATION**

Please amend the specification, as follows:

Add the following new paragraph at p. 6/l. 34:

The device 1 or device 7 may prevent transmission of body fluids between two persons, at least one of whom is male, during sexual relations. The device 1 or device 7 is formed of elastic material and has an inner side, at least a part of which is coated with glue provided to fix the device to the man's sexual organ. At least a second part of the device 1 or device 7 includes a material that is provided to rupture upon ejaculation.
